

Lina Mur Gil

She obtained her Degree in Veterinary Medicine (DVM) at the Veterinary Faculty in the Universidad Complutense de Madrid in 2009. In September of the same year, she joined the team of Professor Jose Manuel Sanchez-Vizcaino in order to do her doctoral thesis in African swine fever (ASF).

In 2009-2010 she obtained her "Master in Research of Veterinary Sciences" at the Universidad Complutense de Madrid.

Since her incorporation in our team, she has participated in national and international conventions, seminars and conferences.

Her current work is dedicated to epidemiological analysis, modeling and analyzing the risk of ASF introduction in the European Union, as well as analyzing the possible risk factors of entry, spread and endemicity. She also works in laboratory techniques, focused on ASF diagnosis.
